Education Provided by staff:

Isolation: To Nurse _____, Head Nurse _____, To Family _____

When Isolation is Discontinued - Place this form in the chart

- There will be signs explaining how to put on and remove personal protective equipment or visitors can ask a nurse if they are unsure of what to do.
- Once your precautions have ended, visitors and staff will no longer be required to wear the personal protective equipment.

Hand Hygiene

Proper hand hygiene is the single most important thing you can do to keep yourself and other patients and residents safe.

How you can help us prevent and control infections in our facilities

Information for Patients and Residents

Why do I need to read this?

You may have heard about hospital associated infections. Sun Country Health Region is committed to reducing your chances of acquiring one of these infections by keeping our hands, equipment, and environment as clean and as safe as possible.

Your help is important!

Sun Country Health Region's staff, patients, residents, and visitors all play an important role in stopping the spread of infection in our facilities.

You can help to stop the spread of infection by following a few simple rules and the guidelines in this brochure. Please take a few minutes to read through this brochure to find out how you can help!

What can patients or residents do to help?

Hand Hygiene

- Hand hygiene instructions can be found on the back of this brochure.
- Wash your hands after using the washroom and before eating.
- Remind visitors to wash their hands with soap and water or alcohol based hand rub when entering and exiting the facility and when entering and exiting your room.
- Remind staff and your doctor to wash their hands if you don't see them do it when entering and exiting your room or before and after any procedures.

Visitors

- Make sure your visitors follow the facility's visiting times and rules.
- Ask your family and friends to not visit if they have any of the following symptoms: cough, fever, diarrhea, vomiting, or nausea.
- Remind your visitors that although children are welcome, young children and babies are more at risk of picking up and passing on infections.
- Encourage your friends and family members to get the flu shot every year. Remind them again when they are visiting you during flu season.

Respiratory Etiquette

- Please cover your mouth and nose when coughing or sneezing.
- Make sure to cough or sneeze into your arm and ask your visitors to do the same.
- Remember to wash your hands afterwards.

Clean Environment

- Keep your area tidy and clutter free. This makes it easier for staff to properly clean and disinfect your room. If proper cleaning and disinfection is not performed microorganisms may spread from one person to another.
- Do not share personal items or equipment, particularly toiletries with other patients or residents.
- Do not sit on other patient's or resident's beds. Ask your visitors to use the chairs provided.
